## MY CITY. MY METRO. Safeguarded by BMTS

On 9th September 2009, Dubai inaugurated its metro network, becoming the first urban metro network in the Gulf. BMTS is proud to be part of this prestigious project and has successfully commissioned

ATEIS - Public Address and Voice Alarm System at the Metro car parks

GENT- Fire Alarm Systems at the Metro stations and Metro car parks and

FM200 Fire Fighting Solution at Metro stations

"The Metro project has been challenging both in terms of deadlines as well as the scale of work. The BMTS team worked hard as a cohesive unit to meet the 09.09.09 deadline. We are proud of our Metro team, full of inspired people who bring a dynamic energy to our organization and a collaborative spirit to work."
