THE YAS HOTEL

The Yas Hotel is like no other hotel ever built. Individuality and excitement are the cornerstones of everything here. No expense has been spared by BMTS, GENT by Honeywell and ATEIS to make this spectacular building one of the world's safest destinations for business or leisure. At The Yas Hotel you can expect the best of everything and this includes state-of-the-art Fire Detection and Alarm Systems that safeguard the lives of everyone who enters here.

9 fire alarm control panels with detailed graphics have been used in this prestigious project. All the panels are networked and all the Squad features also used. The ball rooms, board rooms, reception and all the luxury rooms are equipped with squad sensors. The specially designed rooms for the disabled persons use the most modern technology of Squad sensor sounder flasher.

The BMTS team combined experience, expertise, responsibility and willingness to work in order to complete this challenging project.
