

SUCCESS STORIES

PROJECT MADINAT JUMEIRAH

Mission Possible

This graceful, sand-coloured property heralds a step back in time yet it is equipped with the world's most advanced LIFE SAFETY SYSTEMS. The luxurious interiors are protected with

- > 20,000+ CEAG Emergency Light Fittings
- > 25,000+ GENT Smoke Detectors
- > 450+ Km of Fire Resistant Cables

BMTS was chosen to design and install Madinat Jumeirah's Fire Detection System to safe guard the lives of visitors

and guests. BMTS has equipped this architectural marvel with GENT's intelligent fire detection systems that detect and warn of real fires almost immediately. Bahri & Mazroei Technical Systems has also installed CEAG Emergency Lighting System to provide high quality, reliable emergency lighting in case of power failure.

The project was successfully executed in three phases namely;

- > Mina A' Salam
- > Al Qasar
- > Souq Al Madina

Mina A' Salam

Al Qasar

Souq Al Madina

2006 at a Glance
